Overview

This Release Notes documentation includes information on the list of changes between Rice 1.0.3.3 (released September 9, 2011) and Rice 1.0.4. There are no database or impacting changes between Rice 1.0.3.3 and 1.0.4 and 1.0.4 should be a drop-in replacement.

If you encounter any difficulty, please don't hesitate to contact the Rice team on our public collaboration mailing list at <rice.collab@kuali.org>

Fixes in this release include:

- Bug fixes for two security issues of high severity and one at medium severity.
- [[KULRICE-6632](#)] - KualiMaintenanceDocumentAction is modifying the http request parameter map which is not permitted

Kuali Rice 1.0.4 can be downloaded from the Rice website at <http://kuali.org/rice/download>.

There are three different distributions of Rice available: source, binary and server. Please read the Installation Guide for more details on each of these distributions.

Documentation for this release can be found at at <https://wiki.kuali.org/display/KULRICE/Home+%281.0.4%29>.
