

## **User manual for Risk for android**

If you have never played Risk before see the rule book for the original game.

When starting a local game write the name of each player in turn, clicking "Add Player" in between. View added players to the right.

Choose between the gamemodes World domination or Secret mission by clicking on the dropdown box and then clicken on the one you want.

When all players are added and you have choose a gamemode, click "Start Game" to start the game.

Risk has certain rules for when playing with two player which are not yet implemented in Risk for android, therefor it can currently be played with 3-6 players.

Place your units or choose a province by clicking the dot with a number in the province. If you are placing units clicking on a dot will add one unit to that province. Is you are in the phase attack or movement clicking a dot will simply mark the province as selected. Clicking another valid province will perform the action.

View you cards by clicking the Card button. If a card can be turned in for bonus units combined with other cards it will be highlighted. If you click tree cards that match they will be turned in for bonus units. If you have five card you must turn in three in the Reinforcement phase of your next turn in order to move to the next phase.

View statistics concerning the game such as how many provinces you and your opponent own each by clicking the Stats button. Here you can also read your mission if you are playing the secret mission gamemode.
