Microsoft account

 Let this app access your info?

SecureGallery needs your permission to:

**Sign you in automatically**

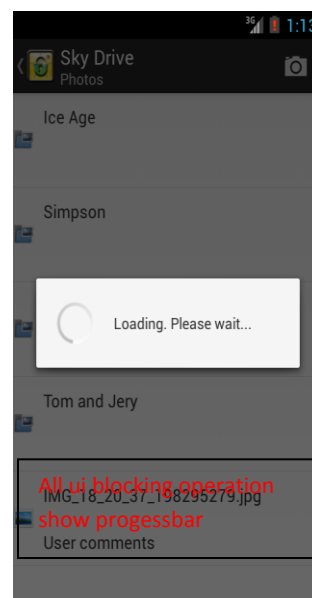

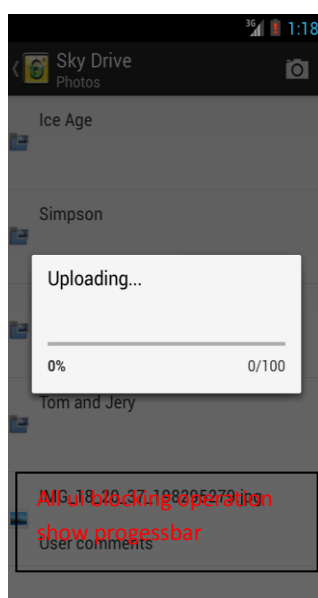

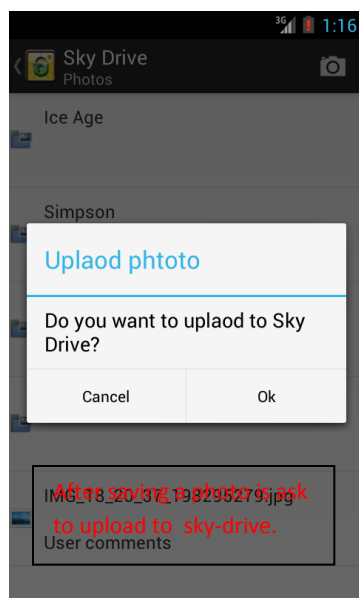

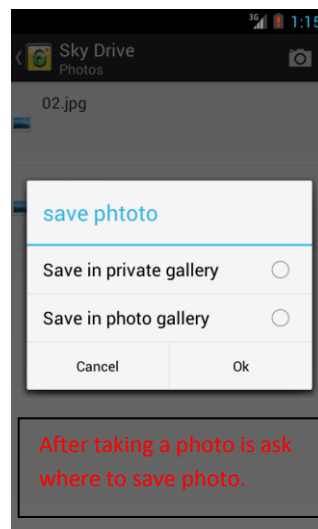

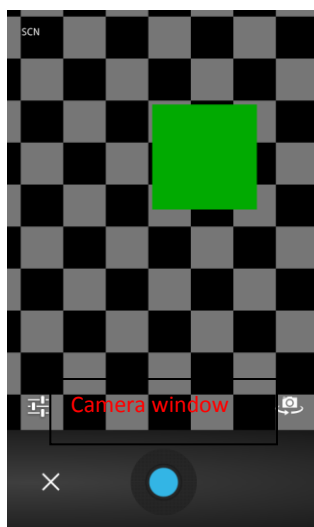

Access your name, gender, display picture, contacts, and friends

Access your info anytime

Access and edit your SkyDrive

Add to your contact list

You can change these application permissions at any time in your account settings.

Implemented features :-

- ActionBarSherlock library used for ActionBar.
- Up navigation enabled.
- Fragment class is used for most cases.
- Local file system used for saving private pictures.
- Device gallery is used to save pictures as well.
- SQLite database used to store user credentials.
- Login and logout for sky-drive is implemented.
- Take a picture using intent action.
- Upload and download picture is implemented.

Following open source library used for this application:-

Git live sdk: <https://github.com/liveservices/LiveSDK.git>

Sharlock library: <https://github.com/JakeWharton/ActionBarSherlock.git>

Note that this application needs minimum api level 8 because of live sdk!
