Detecting deadlocks using static analysis in .NET

Filip Navara

filip.navara@gmail.com

What did I do last week?

- Wrote large part of the paper
  - Still missing: Alias analyses, Partial transfer functions
  - Some parts may need to be rewritten for clarity and more examples should be added
  - Typography and figure placement is messed up on several place
- Collected all the information for diploma thesis paperwork
- Added all the reports and drafts to SVN

What do I plan to do next week?

- Finish text on partial transfer functions, clean up the paper
- Get walrus visualization working
- Wrap up some thoughts about implementation of the interprocedural analysis
